A brief description of the technologies or measures to be deployed:	<p>The project involves tree plantation in the private farmer land by farmers as well as plantation activities by govt institutions and private sector players in private and public land. The tree species range from fruit bearing trees like Indian blackberry, Guava, Mango to commercial timber species like Teak, Mahogany and Sandal, etc. Simple tree cultivation techniques involving planting saplings in the pits with minimum disturbance to the lands have been employed by the selected farmers.</p> <p>The Project Activity Instances will be implemented in across all districts of the state of Andhra Pradesh. The Project Activity will lead to considerable carbon sequestration in the project areas and will contribute strongly to the sustainable development of rural villages involved in the project.</p> <p>Such planting activity would result in carbon credits that would be sold in the carbon market to generate revenue. Area covered: 3000 Hectares</p>
