

Article 6.4 Mechanism
Prior consideration notification form for projects
(V01.0)

Project Title:	300MW hybrid project Maharashtra
Names of the activity participants:	Tata Power Renewable Energy Limited
Host party:	India
Precise geographical location (Full address or GPS coordinates):	100 MW - Koral, Solapur, Maharashtra 200 MW - Jamkhed, Maharashtra
A brief description of the technologies or measures to be deployed:	The project activity involves the installation of hybrid-based electricity generation project. The total installed capacity of the project is 300 MW hybrid (200MW solar, 100MW wind) power plant located in Maharashtra in India.
The Article 6.4 mechanism methodology to be applied (if already known):	Not known
The actual or planned start date of the activity:	23 Jun 2023
The type of the crediting period:	Fixed
Start date of the crediting period:	22 Jan 2024
The approximate amount of GHG emission reductions or net GHG removals expected to be achieved by the project on average:	768,205 tCO ₂ eq per year
