

Article 6.4 Mechanism
Prior consideration notification form for projects
(V01.0)

Project Title:	Pakmem Bundle SPP
Names of the activity participants:	MEM Tekstil Sanayi ve Ticaret Anonim Şirketi
Host party:	Türkyie
Precise geographical location (Full address or GPS coordinates):	Acıçeşme Mevkii, Tavşanalıtı ilçesi, Altınova, Yalova 40.6951 29.4596
A brief description of the technologies or measures to be deployed:	The proposed project activity includes installation of rooftop solar photovoltaic systems with the objective of generating clean energy (electricity) for the purpose of inhouse/captive consumption in the commercial facilities of the project owners. Consumption of clean electricity generated in the project activity by harnessing renewable energy (solar) resources has resulted in avoidance of grid power that was used by the project facility/project owner in the pre-project scenario. The project activity has therefore resulted in curbing emission of greenhouse gas, which would have been emitted from generation of equivalent amount of electricity in the grid tied power plant, that has been avoided due to the project activity.
The Article 6.4 mechanism methodology to be applied (if already known):	Not known
The actual or planned start date of the activity:	12 Jun 2021
The type of the crediting period:	Renewable
Start date of the crediting period:	29 Apr 2022
The approximate amount of GHG emission reductions or net GHG removals expected to be achieved by the project on average:	10,827 tCO ₂ eq per year
