| <b>Project Title:</b>   | 24.9 MW Rehar-I Hydro Electric Project by Chhattisgarh Hydro Power LLP   |
| <b>Names of the activity participants:</b>  | Chhattisgarh Hydro Power LLP   |
| <b>Host party:</b>  | India  |
| <b>Precise geographical location (Full address or GPS coordinates):</b>   | Village – Pasal, Taluka– Bhaiyathan, Surajpur district, State Chhattisgarh<br><br>22° 53' 36" N(22.8933°)<br>83° 57' 10" E(83.9527°)   |
| <b>A brief description of the technologies or measures to be deployed:</b>  | The project involves installation of a 24.9 MW small hydro power projects by Chhattisgarh Hydro Power LLP in the north eastern part of the Chhattisgarh state of India. The purpose of the project is to generate electricity from renewable sources of energy to supply to the national grid of India. The project envisages to utilize the flow of the Rehar River, a tributary to the Sone of Ganga basin for the generation of electrical power in a run-of-river hydro power development. |
| <b>The Article 6.4 mechanism methodology to be applied (if already known):</b>  | Not known  |
| <b>The actual or planned start date of the activity:</b>  | 01 Jul 2024  |
| <b>The type of the crediting period:</b>  | Renewable  |
| <b>Start date of the crediting period:</b>  | 01 Jul 2024  |
| <b>The approximate amount of GHG emission reductions or net GHG removals expected to be achieved by the project on average:</b> | 80,780 tCO <sub>2</sub> eq per year  |
